STANDARDIZATION OF
TENDERFOOT TEST

Foreword

The purpose of Standardization in our Boy Scout activities is to bring into closer harmony the work of the individual troops within the Counties and to create a basis of advancement which will promote greater efficiency. Without a Standardization, the tendency has been to conduct examinations according to the individual interpretations of the examiners with the result that Scouts of one community frequently received promotion in shorter time and with less effort and knowledge than those of another community, or, in fact, than those of another troop in the same community. A uniform system adopted through the Counties will prevent such confusion, and bring about a state which will be fairer to both Scouts and Scoutmasters.

The following will, therefore, be considered the standard for the Counties, and all examinations will be conducted as outlined:

Tenderfoot

This test is to be conducted entirely by the Scoutmaster of the troop. The following examination is to be given orally or in a written test (as directed below) to each recruit. This is necessary in order that all examinations may be fair and to bring before the Scoutmaster all of the details of the requirements. The Scoutmaster is permitted to amplify the examination, if possible. All knots in Requirement 3 are to be studied and the Scoutmaster is to have the recruit tie all the knots as set forth in Sec. 3, of the Tenderfoot requirements. Recruits must pass 100% in all Requirements.

Scoutmasters are strongly urged to conduct an investiture ceremony when Scouts satisfactorily complete their Tenderfoot requirements. The Counties' Standard Investiture is recommended. The ceremony deeply impresses upon each young mind the full meaning of the obligations which have been undertaken.
